WEAR

Subject Index of Volume 220

Air–sand erosion rig
Design and performance of a high velocity air–sand jet impingement erosion facility, 95
Aluminum alloys
Tribological behavior of aluminum alloys surface layer implanted with nitrogen ions by plasma immersion ion implantation, 161
Asperity-based
Computational micro- and macroscopic models of contact and friction: formulation, approach and applications, 113

Carbide reinforced coatings
Processing, structure and tribological behaviour of TiC-reinforced plasma sprayed coatings, 34
Ceramic bearings
On chemo-mechanical polishing (CMP) of silicon nitride (Si_3N_4) workmaterial with various abrasives, 59
Chemo-mechanical polishing (CMP)
On chemo-mechanical polishing (CMP) of silicon nitride (Si_3N_4) workmaterial with various abrasives, 59
Chromium steel cam rollers
Wear volume and wear distribution of hydraulic motor cam rollers studied by a novel atomic force microscope technique, 1
Coatings
Rolling contact fatigue performance of plasma sprayed coatings, 80
Rolling contact fatigue performance of plasma sprayed coatings, 80
Evaluation of wear and tribological properties of coatings rubbing against copper, 154
Coefficient of friction
Friction and wear behavior of Cu–Fe_3Al powder metallurgical composites in dry sliding, 72
Composite
Friction and wear behavior of Cu–Fe_3Al powder metallurgical composites in dry sliding, 72
Contact
Computational micro- and macroscopic models of contact and friction: formulation, approach and applications, 113

Dry sliding wear
Processing, structure and tribological behaviour of TiC-reinforced plasma sprayed coatings, 34

Fe_3Al
Friction and wear behavior of Cu–Fe_3Al powder metallurgical composites in dry sliding, 72
Fluid dynamics
Design and performance of a high velocity air–sand jet impingement erosion facility, 95
Friction
Computational micro- and macroscopic models of contact and friction: formulation, approach and applications, 113
Tribological behavior of aluminum alloys surface layer implanted with nitrogen ions by plasma immersion ion implantation, 161
Friction and wear
Micromechanical and tribological characterization of hard amorphous carbon coatings as thin as 5 nm for magnetic recording heads, 51

Hard amorphous carbon coatings
Micromechanical and tribological characterization of hard amorphous carbon coatings as thin as 5 nm for magnetic recording heads, 51
High velocity
Design and performance of a high velocity air–sand jet impingement erosion facility, 95
Homogenization
Computational micro- and macroscopic models of contact and friction: formulation, approach and applications, 113
Hydraulic motor
Wear volume and wear distribution of hydraulic motor cam rollers studied by a novel atomic force microscope technique, 1
Hydrodynamic polishing process
On machining rate of hydrodynamic polishing process under semi-contact lubricating condition, 22

Lubrication
Hydrodynamic lubrication analysis for tube spinning process, 145

Machining rate
On machining rate of hydrodynamic polishing process under semi-contact lubricating condition, 22
Magnetic float polishing (MFP)
On chemo-mechanical polishing (CMP) of silicon nitride (Si_3N_4) workmaterial with various abrasives, 59
Magnetic recording heads
Micromechanical and tribological characterization of hard amorphous carbon coatings as thin as 5 nm for magnetic recording heads, 51
Mechanical properties
Micromechanical and tribological characterization of hard amorphous carbon coatings as thin as 5 nm for magnetic recording heads, 51
Medical device
Experimental study of hydrodynamic propulsion of a medical device with a spiral ribbed impeller, 141
Micromodel
Computational micro- and macroscopic models of contact and friction: formulation, approach and applications, 113
Mixed lubrication
On machining rate of hydrodynamic polishing process under semi-contact lubricating condition, 22
Mucus
Experimental study of hydrodynamic propulsion of a medical device with a spiral ribbed impeller, 141

Oxide film
Friction and wear behavior of Cu–Fe_3Al powder metallurgical composites in dry sliding, 72

Particle accelerated wear
Wear of elastomeric seals in abrasive slurries, 9

Elsevier Science S.A.

Pin – on disk (POD) test
Processing, structure and tribological behaviour of TiC-reinforced plasma sprayed coatings, 34
Plasma immersion ion implantation
Tribological behavior of aluminum alloys surface layer implanted with nitrogen ions by plasma immersion ion implantation, 161
Plasma spraying
Rolling contact fatigue performance of plasma sprayed coatings, 80
Rolling contact fatigue performance of plasma sprayed coatings, 80
Polishing
On chemo-mechanical polishing (CMP) of silicon nitride (Si_3N_4) workmaterial with various abrasives, 59
Polyurethane seals
Wear of elastomeric seals in abrasive slurries, 9
Powder metallurgy
Friction and wear behavior of Cu–Fe_3Al powder metallurgical composites in dry sliding, 72

Reynolds equation
Hydrodynamic lubrication analysis for tube spinning process, 145
Rolling contact fatigue
Rolling contact fatigue performance of plasma sprayed coatings, 80
Rolling contact fatigue performance of plasma sprayed coatings, 80

Seal wear
Wear of elastomeric seals in abrasive slurries, 9
Silicon nitride
On chemo-mechanical polishing (CMP) of silicon nitride (Si_3N_4) workmaterial with various abrasives, 59
Spiral ribbed impeller
Experimental study of hydrodynamic propulsion of a medical device with a spiral ribbed impeller, 141

Thermal spraying
Processing, structure and tribological behaviour of TiC-reinforced plasma sprayed coatings, 34
TiC
Processing, structure and tribological behaviour of TiC-reinforced plasma sprayed coatings, 34
Traction drive
Experimental study of hydrodynamic propulsion of a medical device with a spiral ribbed impeller, 141
Tube spinning process
Hydrodynamic lubrication analysis for tube spinning process, 145
Tungsten carbide
Rolling contact fatigue performance of plasma sprayed coatings, 80
Rolling contact fatigue performance of plasma sprayed coatings, 80

Wear
Tribological behavior of aluminum alloys surface layer implanted with nitrogen ions by plasma immersion ion implantation, 161
Wear debris
Rolling contact fatigue performance of plasma sprayed coatings, 80
Rolling contact fatigue performance of plasma sprayed coatings, 80
Wear resistant coatings
Processing, structure and tribological behaviour of TiC-reinforced plasma sprayed coatings, 34
Wear test
Evaluation of wear and tribological properties of coatings rubbing against copper, 154
Wear volume and distribution
Wear volume and wear distribution of hydraulic motor cam rollers studied by a novel atomic force microscope technique, 1
